- 2 Steel rods

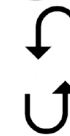

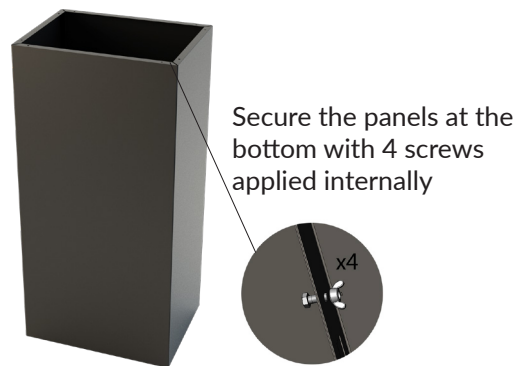

1

2

3

Place the bottom panel and secure with 8 screws

Screw in all 6 feet. 4 in the corners and 2 in the middle

Turn the stand upside down

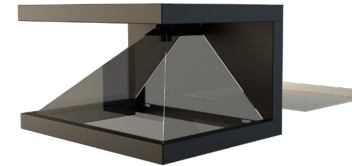

## Locking the HD3 to the stand

It is very important to lock the HD3 display to the stand, and place a lot of weight at the bottom of the stand, in high traffic areas.

Remove the HD3 from the stand and turn it around, so the plate with the hole for the vesa mount is at the front.

Remove both back plates and the center stage

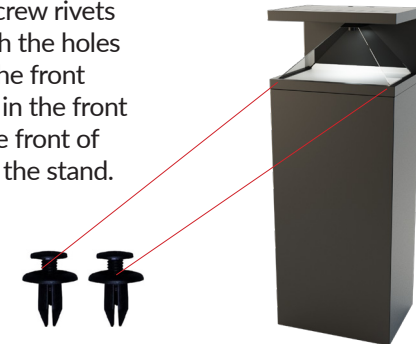

Insert the steel rods into the plastic base of HD3 and push the steel as far as possible into the HD3 plastic base.

Slide the HD3 down on top of the stand, so the steel rods will lock the back of the HD3 to the stand.

Insert the 2 plastic screw rivets inside the stand in the 2 holes close to the front corners. Make sure that the plastic screw rivets are going through both the holes in the stand close to the front corners and the holes in the front bottom of HD3, so the front of HD3 will be locked to the stand.

Place the center stage and back plates in the display again.

Insert two bolts in the front and secure with bolts. Place the Dreamoc on top of the display.
