# DREAMOC XL5 SMART FRAME STAND – ASSEMBLY GUIDE

VERSION 1.1

It is important to read this assembly guide before using the Dreamoc XL5 smartframe stand, and to follow advices and instructions on safety, operation and general use to get the best possible experience with your Dreamoc. The Dreamoc XL5 is designed to showcase products and other objects in combination with free floating 3D video animations. Realfiction and Dreamoc are registered trademarks owned by Realfiction ApS.

## Package contains

- 12x aluminum profiles
- Umbraco key
- Fork spanner
- 12 x self-tapping screws

## Assembling the stand

1. Connect the aluminum profiles by locking them together as shown in the images below. Tighten the screws to secure the profiles together with the umbraco key.

2. When the stand frame is assembled, adjust the feet if needed and tighten them with the fork spanner.

3. To secure the displays on the stand, lift the display in place on top of the stand. There are notches in the corner profiles to match the feet on the Dreamoc XL5.

4. Mount the stand print on each side by pressing the silicone seam into the external groove of the aluminum profiles. Begin with the four corners, then in the middle and then press in the remaining parts. This method secures a tight and even fit to the stand frame.

## Storing the stand prints for later use

- The stand prints need to be completely dry before storing them away.
- Fold them backside against backside
- Place sheets of plastic/paper where the printed parts meet.
- Avoid too many creases.
- Avoid placing too many stand prints together in the same package.

Be aware that the stand print is a coated fabric that might rub off.

## Placement

The Dreamoc XL5 Smart Frame must be placed on a horizontal, stable and plane surface. The stand must be fitted with sufficient ballast.

Do not install the stand in narrow passageways or other places where a lot of people and equipment has to pass close by, thereby risking collisions that might cause the stand to tip over causing human injuries and damage to property.

## Disassembling the stand

1. Remove all the prints from the side and store them in a box by themselves.
2. Loosen the screws, but be aware not to remove them from the profile as the screws and locks inside the profiles will fall out.
