Welcome to Dreamoc Fusion

We are very excited that you wish to start using the new built-in Dreamoc Fusion feature, to create even more magical experiences out there.

Currently supported Dreamoc displays: HD3, POP2, POP3

The Dreamoc Fusion feature is currently released in beta versions.
We are working on further optimizing the service, and as beta tester you are an important part in that process.

We need your relevant and constructive feedback.
This can be in the form of error reporting, wishes for added/better functionalities or documentation. But it is just as important to give us positive and encouraging feedback. We would love to hear if you find it easy and hassle-free to use, and we welcome any pictures and video that shows creative installations or tests using Dreamoc Fusion.

Download the latest Dreamoc Fusion release here:
https://www.dropbox.com/l/sh/yIxYpcm2zKAyqQuBu5gwMr
Please note that by using any of the Dreamoc Fusion beta releases, you automatically agree to the Terms and Conditions described in the "TERMS.pdf" document included in those releases.

Detailed instructions are found in the "READ ME" pdf.
Simple test content is included.

Hope you like it!

Best regards
Clas Dyrholm
